WSL 2

A screenshot of a Windows PowerShell window titled "Windows PowerShell". The window displays the following text:

```
ADMIN Windows PowerShell
Copyright (C) Microsoft Corporation. All rights reserved.

Try the new cross-platform PowerShell https://aka.ms/pscore6

PS C:\Users\ADMIN> wsl --install
Copyright (c) Microsoft Corporation. All rights reserved.

Usage: wsl.exe [Argument] [Options...] [CommandLine]

Arguments for running Linux binaries:

If no command line is provided, wsl.exe launches the default shell.

--exec, -e <CommandLine>
    Execute the specified command without using the default Linux shell.

--
    Pass the remaining command line as is.

Options:
--cd <Directory>
    Sets the specified directory as the current working directory.
    If -- is used the Linux user's home path will be used. If the path begins
    with a / character, it will be interpreted as an absolute Linux path.
    Otherwise, the value must be an absolute Windows path.
--distribution, -d <Distro>
    Run the specified distribution.
--user, -u <UserName>
    Run as the specified user.

Arguments for managing Windows Subsystem for Linux:

--help
    Display usage information.

--install [Options]
    Install additional Windows Subsystem for Linux distributions.
    For a list of valid distributions, use 'wsl --list --online'.

Options:
--distribution, -d [Argument]
    Downloads and installs a distribution by name.

Arguments:
    A valid distribution name (not case sensitive).
```

The background of the desktop shows a sunflower and a Wi-Fi icon in the bottom right corner. The taskbar at the bottom includes the search bar, task view button, and several application icons.

A screenshot of a Windows PowerShell window titled "Windows PowerShell" showing the configuration and installation of WSL 2. The window displays the following text:

```
--set-default, -s <Distro>
    Sets the distribution as the default.

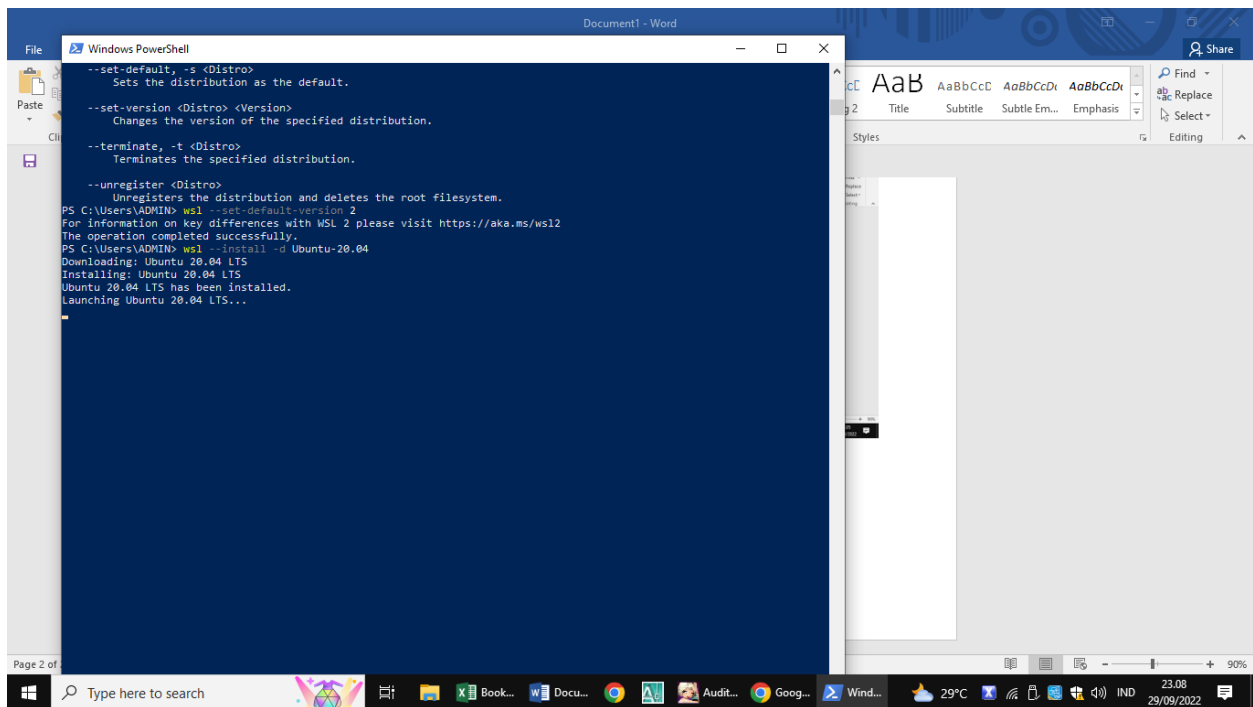

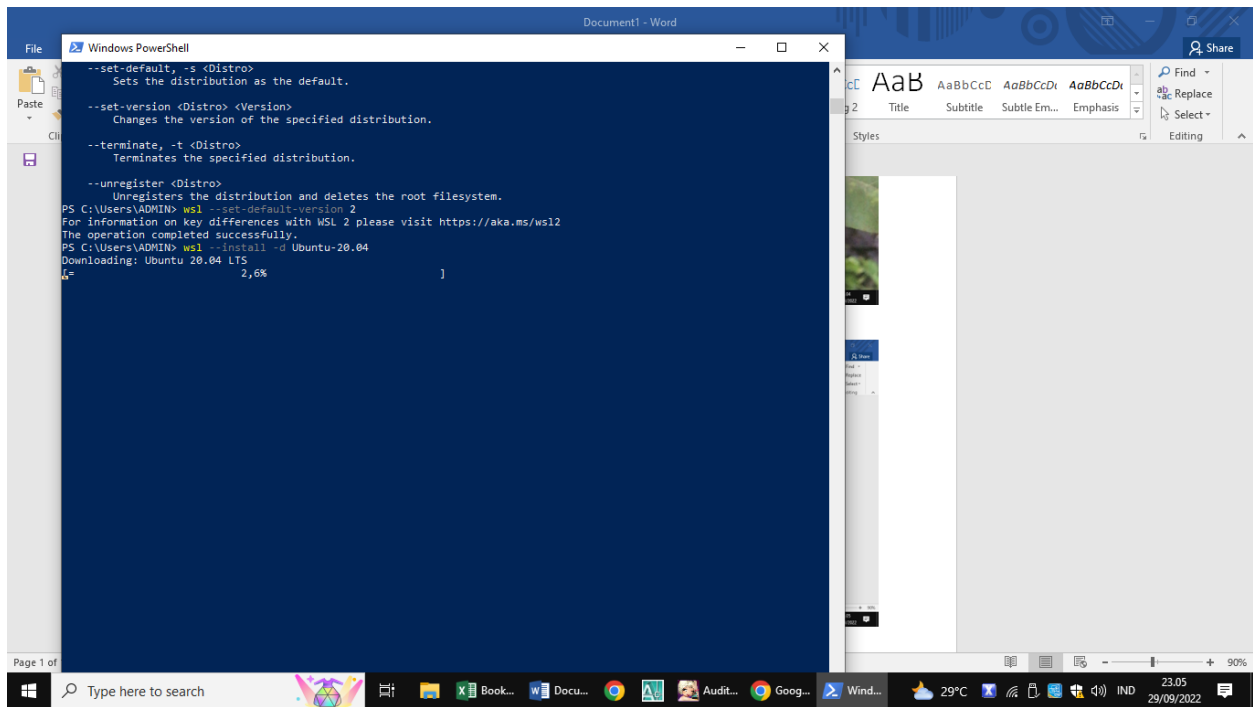

--set-version <Distro> <Version>
    Changes the version of the specified distribution.

--terminate, -t <Distro>
    Terminates the specified distribution.

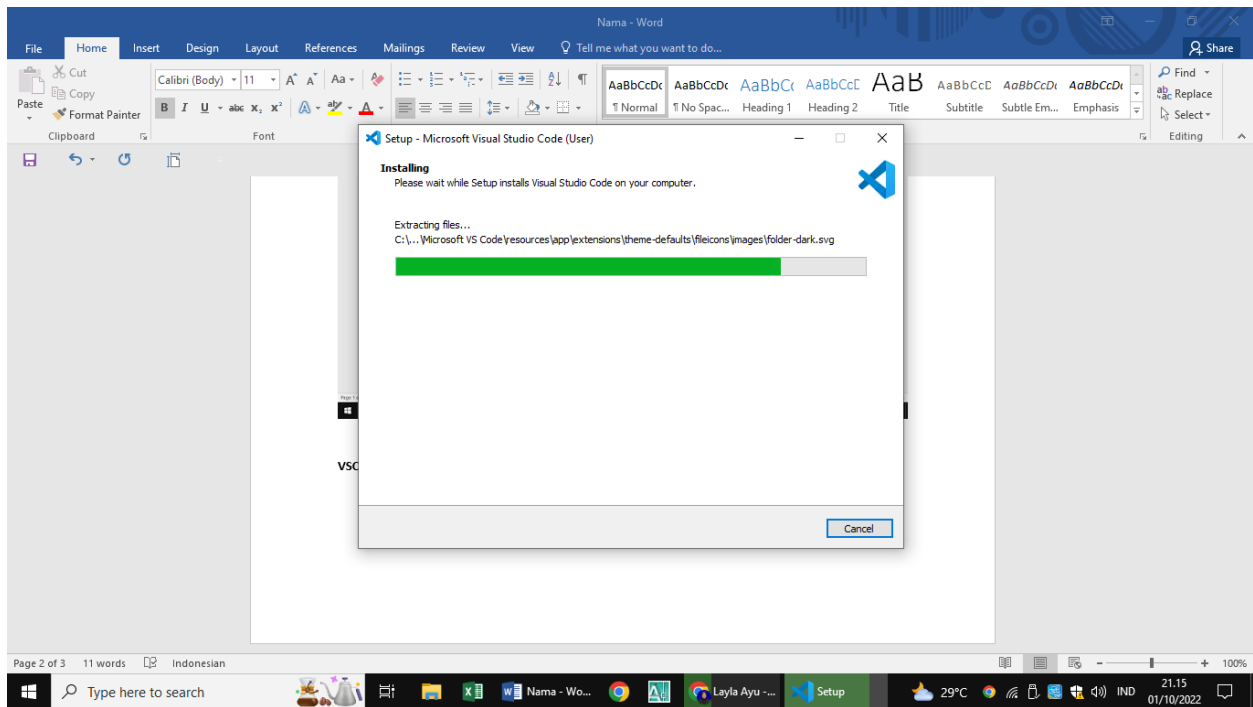

--unregister <Distro>
    Unregisters the distribution and deletes the root filesystem.

PS C:\Users\ADMIN> wsl --set-default-version 2
For information on key differences with WSL 2 please visit https://aka.ms/wsl2
The operation completed successfully.
PS C:\Users\ADMIN>
```

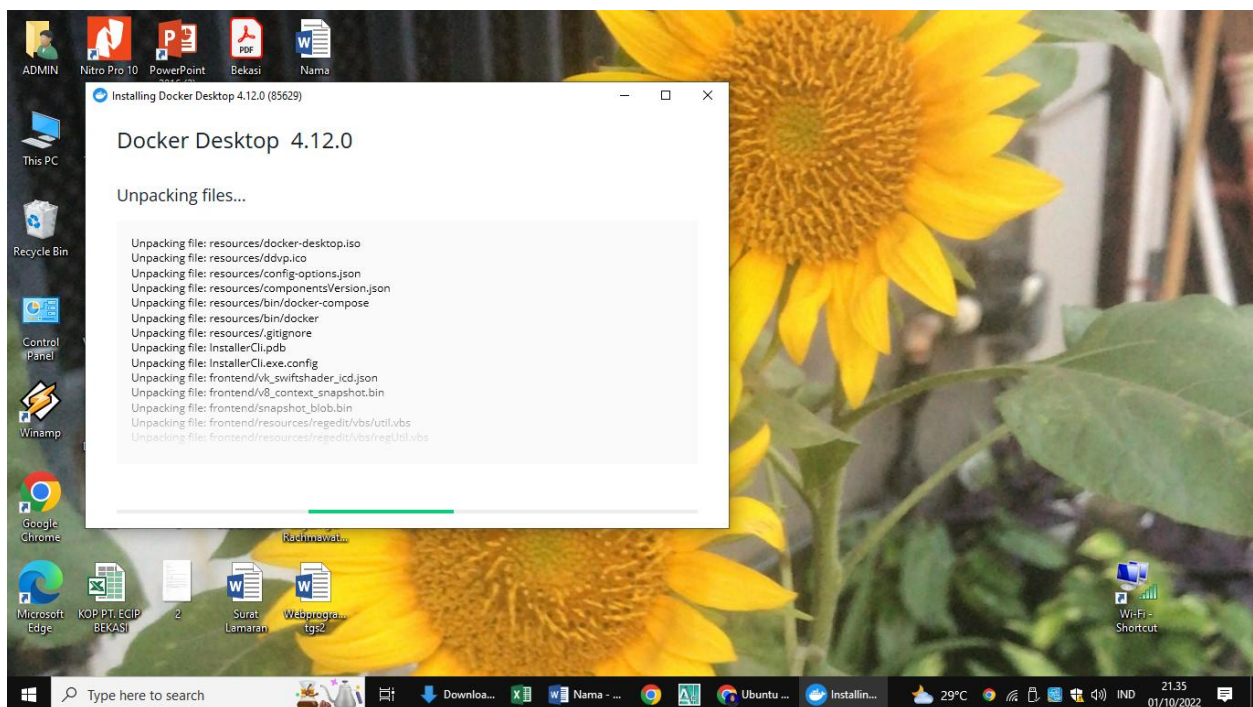

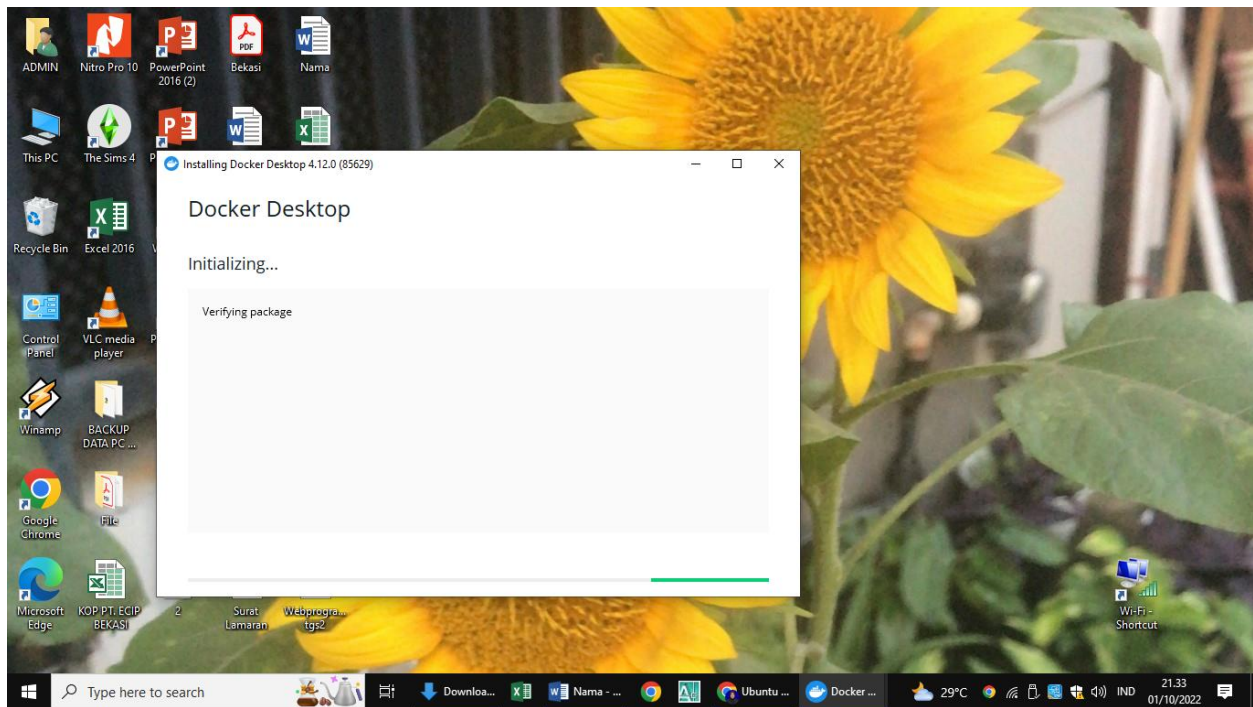

The background of the desktop shows a document titled "Document1 - Word" and a Wi-Fi icon in the bottom right corner. The taskbar at the bottom includes the search bar, task view button, and several application icons.
